Leading the Way in Precious Metal Reclamation

Your gold, silver, platinum,
palladium, rhodium, iridium and
ruthenium recovery experts

(401) 490-4555 | www.qml.us

ISO 9001 and ISO 14001 Certified

One of the largest recyclers of PGMs

We are one of the world's largest recyclers of scrap automobile catalyst. Headquartered in Pasadena, Texas, we have branch offices in Mexico, Italy, UK, Canada and Brazil

Celebrating **50 Years**

Connect • Learn • Build Relationships

2026 is Our Golden Jubilee

IPMI 50th Logo Presentation is now live

For fifty years, IPMI's iconic networking ring has represented **Connection** across the precious metals world. Our Golden Jubilee mark builds on that legacy, and the full story is now available in a short presentation.

You will also see how this anniversary reflects what IPMI stands for: **Connect • Learn • Build Relationships**, alongside the Foundation mission of **Advancing Precious Metals Education**.

Visit: <https://www.ipmi.org/50th/ipmi-50th-logo-presentation>

As part of Platinum Week in London, the European Chapter of the IPMI will host a networking event at Coq d'Argent on the 20th of May 2026 from 2–5 pm.

Premier Recycler of PM/PGM-Bearing Residue, Sludge, and other Industrial Metal By-Products

Serving the International Precious Metals Industry for nearly 50 years

- ISO certified 9001, 14001, 45001, 50001, award winning operations for Supply Chain Security;
- Knowledge-based & global in scope serving Asia, Europe and North & South American markets;
- Strategically located facilities in Arizona, Pennsylvania, Germany and Taiwan;
- Sustaining and conserving nonrenewable & strategic resources for future generations;
- Patented and proprietary technologies that solve complex resource recovery problems;
- US EPA permitted RCRA facilities & equivalent agency facility-permits in Germany & Taiwan;
- Operations in full compliance with applicable domestic & international laws & regulations;
- Conserving energy & using 100% renewable power and offsets for all operational and facility needs;
- Global carbon neutral operations and acclaimed LEED-Silver facility building design;
- Serving the entire PM/PGM and industrial supply chain in the global circle economy from primary industrial processing through to the advanced manufacturing sector, all.....

PMR — Precision, Transparency, and Performance in Converter Recycling

PMR is a specialized catalytic converter processor focused on the recovery of platinum, palladium, and rhodium from spent automotive catalysts. With operations spanning Canada and the United States, PMR delivers advanced processing capabilities, data-driven transparency, and customized business solutions designed to help recyclers navigate volatile markets with confidence.

Built for Today's Converter Market

In an environment defined by price fluctuations, supply-chain pressure, and increasing compliance requirements, PMR provides recyclers with more than just processing — it offers strategic partnership. Through tailored programs, hedging options, and proprietary tracking tools, suppliers gain greater control over volume, cash flow, and long-term planning.

PMR's consultative approach is supported by detailed reporting and analytics, giving partners clear visibility into material performance, returns, and operational trends.

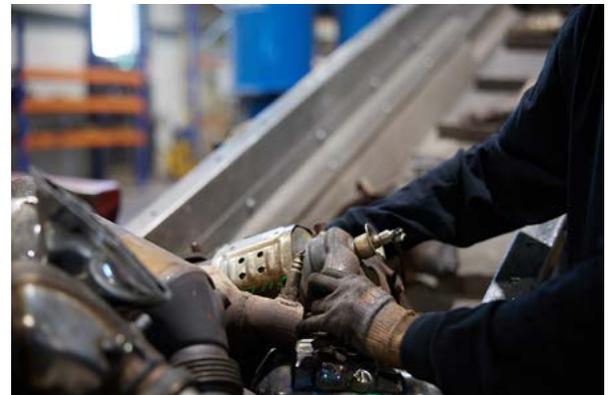

Technology-Driven Processing

PMR continues to invest heavily in innovation to improve efficiency and turnaround times. Purpose-built machinery developed in-house allows converters to be graded, decanned, and crushed in a streamlined workflow, reducing processing delays across facilities. These advancements position PMR to deliver faster settlements while maintaining rigorous accuracy and quality standards.

Leadership Focused on Continuous Optimization

Under the leadership of President & CEO Christian Thibault, PMR operates with a mindset rooted in constant calibration — fine-tuning processes, technology, and partnerships to maximize results. Drawing from hands-on experience in automotive operations and competitive motorsports, PMR's leadership emphasizes performance, accountability, and long-term value creation for the recycling industry.

A Long-Term Partner

While short-term market conditions can challenge recyclers, PMR remains focused on the long game. Converter recycling continues to be a critical and profitable segment of the precious metals ecosystem, and PMR stands ready to support suppliers when they choose to invest, optimize, and grow their converter programs.

Catalytic Converter Recycling

REFINING THE FUTURE

TURNING VISION INTO VALUE

PMR invests where it matters — technology, data, and R&D that move the converter industry forward.

Innovation isn't a promise.
It's our operating system.

Smarter insights.
Stronger returns.
Real advantages for recyclers
ready for what's next.

SEE HOW INNOVATION
BECOMES VALUE.

TANAKA PRECIOUS METAL GROUP Co., Ltd.

TANAKA to Provide Medals for the Tokyo Marathon 2026 That Represent All the Participants in the Event with Woven Lines

TANAKA PRECIOUS METAL GROUP Co., Ltd. (Head office: Chuo-ku, Tokyo; Group CEO: Koichiro Tanaka) will provide and donate gold, silver, and bronze medals to the top three men and women finishers of the marathon and wheelchair marathon events at the Tokyo Marathon 2026. The Tokyo Marathon 2026 is organized by the Tokyo Marathon Foundation and will be held on March 1, 2026.

■ Design Representing All the Participants in the Event with Woven Lines

The medals were designed based on the concept of the Tokyo Marathon: The Day We Unite. On the front of the medal, the logo type is placed horizontally above the event logo pattern, which represents “runners, supporters, and cheerers,” to express the image of the Tokyo Marathon, which is held based on the involvement of many people, including runners, as well as volunteer staff and cheerers.

On the back of the medal, the name of the event, Tokyo Marathon 2026, is written in Braille, and the words “FINISHER” and the event date are engraved, along with TANAKA’s logo. The medal’s ribbon design continues the 2016 design and is based on the event logo, which resembles a tapestry of lines woven together to represent all the runners, volunteers, and spectators.

■ Sustainability Initiatives

The Tokyo Marathon 2026 is advancing sustainability initiatives centered on “waste reduction,” “environmental conservation,” and “DEI (Diversity, Equity & Inclusion).” In support of this initiative, the medal ribbons are made using recycled polyester. In addition, for the gold medals, the gold plating solution used is from TANAKA’s “RE Series” regenerated precious metals made using only 100% recycled materials. Through these initiatives, TANAKA is helping to make the event more sustainable.

■ About the Tokyo Marathon 2026

The Tokyo Marathon 2026 is the 19th edition of one of the largest public participation marathons in Japan. As it will celebrate its 20th anniversary in 2027, the event has evolved further to help all the participants play active roles so that the metropolis of Tokyo unite as one, based on three pillars: “The safest and most secure race in the world,” “The most exciting race in the world,” and “The warmest and most friendly race in the world.” This year, the event has adopted “Run. Tokyo. Own.” as the keyword to express how, on the grand stage of Tokyo, each runner lives their own run and their own story—and how countless individuals coming together create “one Tokyo” for that day and that moment alone.

TANAKA has produced the winner and finisher medals for every Tokyo Marathon since the first held in 2007, with this year marking the 19th year. The Tokyo Marathon joined the World Marathon Majors (currently the Abbott World Marathon Majors) in 2013, attracting global attention as one of the world’s seven premier marathons. Other than the Tokyo Marathon, TANAKA has also produced medals for the winners of the Tokyo Legacy Half Marathon, supported the promotion of para sports as an official partner of the Japanese Para Sports Association (JPSA), and produced and sold official commemorative medals for the 1964 Tokyo Olympic Games. As part of its contribution to the realization of an inclusive society and the creation of a healthier society, TANAKA will continue to support the promotion of sports going forward.

<Overview of the Tokyo Marathon 2026 Medals>

【Weight, size and material】

- Gold Medal: approx. 100g 65mm in diameter and approx. 3mm: pure silver with gold plating
- Silver Medal: approx. 100g 65mm in diameter and approx. 3mm: pure silver
- Bronze Medal: approx. 85g 65mm in diameter and approx. 3mm: pure copper plating

Company Information

■ About TANAKA

Since its foundation in 1885, TANAKA has built a portfolio of products to support a diversified range of business uses focused on precious metals. TANAKA is a leader in Japan regarding the volume of precious metals it handles. Over many years, TANAKA has manufactured and sold precious metal products for industry and provided precious metals in such forms as jewelry and assets. As precious metals specialists, all Group companies in Japan and worldwide collaborate on manufacturing, sales, and technology development to offer a full range of products and services. With 5,591 employees, the group's consolidated net sales for the fiscal year ended December 2024 were 846.9 billion yen.

A new chapter for recycling

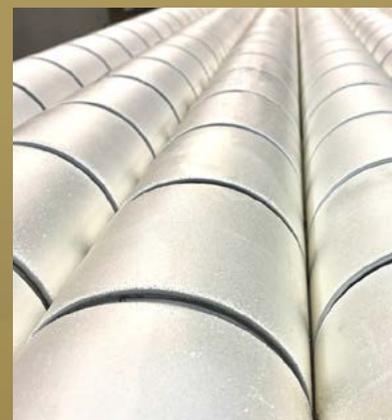

Sustainable Solutions Now

We are excited to share an important milestone in our journey of growth and innovation. Following the acquisitions of Reldan in March 2024 and Metallix in September 2025, the two respected leaders in precious metal recycling and refining will be unified as the Sibanye-Stillwater Group's recycling business.

This consolidation combines the shared strengths of both companies and progresses our ambition to lead the precious metal recycling and refining sector on a larger scale. Together, we are creating a future defined by collaboration, innovation, and sustainability.
